

PROTEA GROWERS LLC

These exotic blooms, originally from Southern Africa, are now grown by Resendiz Brothers Protea Growers LLC, in Rainbow, California. We are the Nation's largest grower of quality Proteas. We are dedicated to providing you with the highest quality Protea blooms, harvested daily and shipped farm-fresh to your door.

Protea are seasonal, so the assortments in our boxes will vary somewhat. Each day we cut the best blooms and provide you with as great a variety as possible. The foliage we include is also from the Protea family, which compliment the dramatic Protea flowers.

Protea are naturally long-lasting. We have prepared them prior to shipping with a solution to further enhance vase life. Like all flowers, they will last longer when placed away from heat and direct sunlight.

We Recommend:

- 1. Cut $\frac{1}{2}$ " from stem, on a slant.
- 2. Immediately place in fresh water.
- 3. Re-cut stems and change water every other day.

Protea can absorb large amounts of water, so please make sure they have plenty.

Tip: put a spoonful of sugar in the water to increase longevity

Protea dry well, and then can be used in dried arrangements for many months. To dry them, remove from water when past their peak, then store in a dark dry place until well dried, usually about one month.
